

**RUPES®**

RUPES AIR JET PAD CLEANER

The **RUPES AirJet Pad Cleaner** restores pad performance to peak by quickly removing paint and compound residue, enhancing defect removal and finish quality. In just 3 seconds, its compressed-air spiral action cleans the pad, optimizing polishing efficiency.

RUPES recommends cleaning pads at least once per panel or square meter during machine polishing to maintain peak performance. The AirJet Pad Cleaner works especially well with wool or microfiber pads, keeping them more effective, efficient, and cooler. Clean pads last longer and improve polishing results.

For added safety and cleanliness, use our supplemental vacuum kit to instantly extract paint and compound residue and vacuum into any dry vacuum unit. This maintains the powerful cleaning action of the AirJet Pad Cleaner, but also keeps the surrounding area clean making this system both safer and more efficient.

SPECIFICATION

Code **9.AG5500**

- Air connection inlet: **1/4"**
- Free Speed: **5.500 R.P.M.**
- Hose diameter (recommended): **10 mm (3/8")**
- Working pressure: **4.5-6.3 bar (65-91 psi)**
- Max. working pressure: **8 bar (116 psi)**
- Dimensions / length: **156 mm x 43 mm x 104 mm**
- Net weight: **0.17 kg**
- Air requirement: **170 l/min (6.0 SCFM)**
